Low Pressure Test Kit

- ✓ Accurate
- ✓ Cost Effective
- ✓ Convenient
- ✓ Durable

Marshall Brass is pleased to announce availability on our new Low Pressure Test Kit. The Kit is used to determine gas pressure at an appliance or any point on a low-pressure system.

The test kit is enclosed in a durable case with 3 feet of rubber tubing and the operation manual. It eliminates the inconvenience of carrying a water manometer. The gauge is dual-calibrated (0-20 oz./in² and 0-30 in. H₂O).

Part #	Description	Case Quantity	List Price
G-300	Low Pressure Test Kit	45	\$83.83
